TRAILERS

Moving floor: a smart investment

The tried and tested moving floor vehicles from Knapen Trailers have proven their value in numerous agricultural applications:

- › Suitable for year-round operation
- › Rapid unloading without the driver having to leave the vehicle
- › Large volume, low own weight
- › Motorway capable
- › Available as drawbar version, semi-trailer or body
- › Customer-specific tailor-mode solutions
- › Safety: no toppling risk
- › Reliable: few moving parts
- › Also ideally suited for pallets, big-bags and bales

K100-A:

3 month off-road tyres, 9 months on-the-road tyres

During the harvest period, simply fit the K100-A with off-road tyres. The rest of the year, drive on standard on-the-road tyres. With on-the-road tyres, the vehicle is motorway capable. With off-road tyres, off-road operations are possible as well as a maximum speed of 65km/h on the road. This vehicle complies fully with all German LOF (Agriculture and Forestry) requirements. This means you enjoy exemption from road tax, toll charges, Sunday driving restrictions and a digital tachograph requirement. A smartly timed tyre change means the K100-A is available for year round operation.

4-axle model

Lorry with moving floor

Hydraulic folding roof

Automatic packaging

Multifunctional trailer

Internal grain funnel

Chopper unit

Rapid automatic covering with the PowerSheet®

Ease of loading and unloading: opening upper beam

Hydraulic suspension

Heavy-duty towing eye

your agricultural moving floor?

Knapen Trailers, specialists in tailor-made solutions

Since 1984, our attention has been focused on the continuous improvement of just one product: the moving floor trailer. Trailers of this type have proven their value in the agricultural sector and elsewhere, as a smart, multifunctional transport solution. Growing numbers of agricultural contractors and large farm owners are now investing in tailor-made moving floor vehicles. We have named our latest vehicle generation **NEXT**. This vehicle generation is fully robot-welded, extensively tested and based on more than 33 years' experience. These qualities guarantee our customers years of problem-free operation, the lowest possible total costs and maximum residual value. We are committed to it and our customers may hold us to that.

By constantly moving boundaries, we have stayed ahead of the competition in our sector, for more than 33 years.
