Extremely wear-resistant!

# Dura-Floor

## Extremely wear-resistant!

### Extremely wear-resistant

“After a year of unloading glass, the Dura-Floor does not show any visible difference in thickness!”

The Dura-Floor is the proven floor for rough loads such as waste, household refuse, grit, gravel, sand, metal chips and even glass shards.

### Lowest Cost of Ownership

A floor replacement constitutes a major component of the operating costs.

Thanks to the Dura-Floor, moving-floor transporters are guaranteed the lowest total costs and the highest residual value.

### Pushing boundaries:

Since 1984 we have been constantly pushing the boundaries in our industry. Continuous improvement is in our DNA.

The patented Dura-Floor is an example of a unique Knapen Trailers innovation. Since 2015, the Dura-Floor has been the proven benchmark in the transport of rough cargoes.
